1968 VINTAGE MECHANICAL

## INTRODUCTION

The 1968 Mechanical collection pays homage to the final year of the mechanical golden era, just before quartz technology began to dominate the industry. Celebrating the charm of mechanical movements and designed to capture the understated elegant aesthetic and spirit of the late 1960s.

At first glance the watches are beautifully simple, but with daily wear their true character unfolds when the details of the layered dial and the case design reveal themselves, offering a deeper appreciation over time.

The daily ritual of winding a mechanical movement invites you to a small, reflective moment that connects you to the timeless art of watchmaking.

## **SPECIFICATIONS**

Caliber:	SeaGull ST17 Handwind
Power reserve:	39 Hours, Fully wound
Glass:	Double domed Sapphire Crystal
Water Resistance:	5. ATM - Water tested to 50 Meters

## **HOW TO SET TIME**

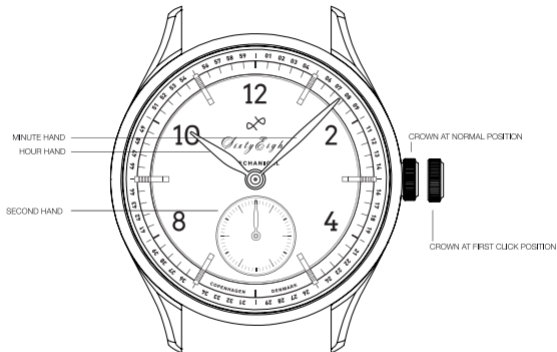

1. Pull crown out to first click position.
2. Turn the crown counterclockwise to set hour and minutes hand.
3. Push the crown back into normal position.

## **HOW TO WIND YOUR WATCH**

1. With the crown in normal position turn the crown clockwise.
2. Stop when you feel resistance!

**It is important to stop when feeling resistance when winding.  
If the watch is wound too hard it can damage the spring.**
